

Skylight Protection Film (SP70)

ClearPro Skylight Protection Film is a thermal insulation protective film made of TPU material attached to the outside of the skylight glass. It has high infrared barrier, 99% UV barrier, high definition, high impact resistance, and self-healing performance. Especially for various types of cars with panoramic sunroofs, it can better keep the interior of the vehicle cool and enjoy a brand new driving experience. Meanwhile, due to the softness of TPU material, it is also very easy installation.

CATEGORY	VALUE	CATEGORY	VALUE
Top Coating	Polyoptico™	Film Thickness	8 mil
60°Surface Gloss	95	Hydrophobic Angle	105°
Visible Light Transmitted	70%	Ultraviolet Rejected	99%
Infrared Ray Rejection	92%	Initial Peel Adhesion (ASTMD-882)	23 N/in
Aging Resistance (UV Test:6000H)	Pass	Chemical Resistance (Acid Test)	Pass
Impact Test (SAE J400)	Pass	Warranty	10 Years

Note: 1. All the above values are nominal and should not be used for specification purposes
 2. For more technical parameters, please refer to the official website :www.clearpro.com.
 3. Width available: 12 inches, 24 inches, 30 inches, 36 inches, 48 inches, 60 inches, 72 inches
